## II. HOW TO SETUP

Open the Play scene in Scene folder. You will see main UI

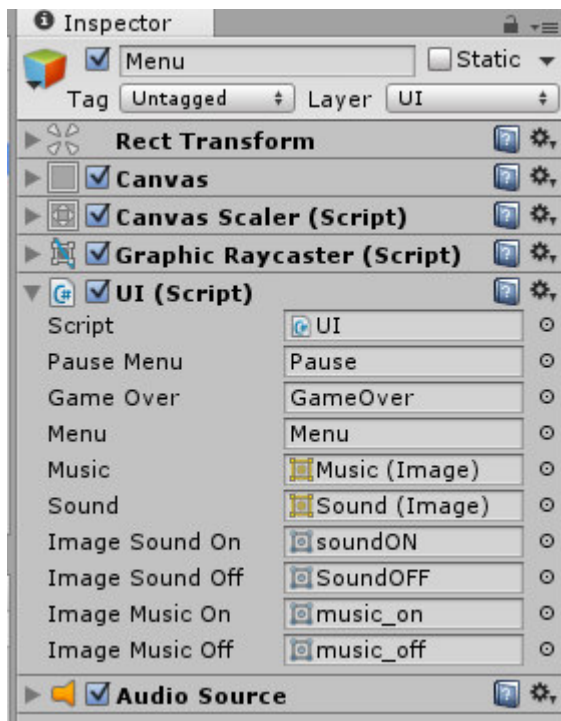

## In Hierachy

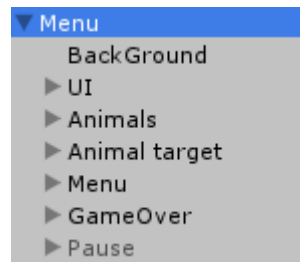

1. **Menu:** Main Menu UI
2. **Gameplay:** manager all animals and gameplay
3. **AdsController:** manager admob ads

## 1. Menu

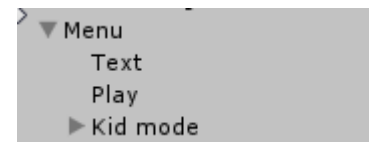

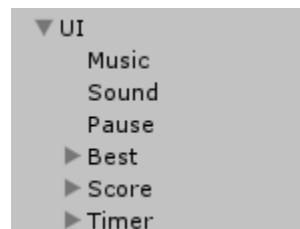

UI script: place all objects in this, almost of them are in UI object in Menu object.

- **Animal UI:** 4 opts pick animals
- **Menu UI:** Show up when start game
- **Both of them are controlled by Gameplay object**

object

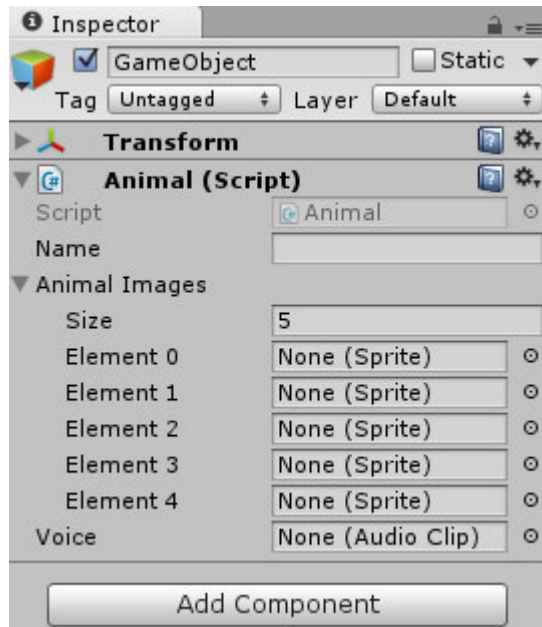

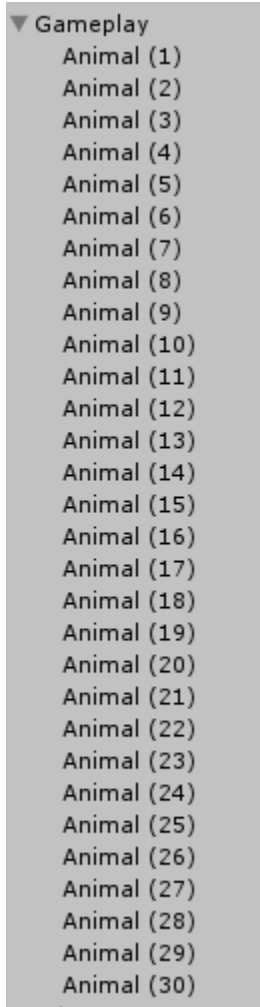

- **Menu:** 2 mode

## 2. Gameplay: Control create animals and handle gameplay

- I just create 30 animals, if you want more you can follow my instruction below, very simple

+ Create new object and place it into Gameplay object, Drag Animal script on it

- **Name:** Name of new animals

- **Animal Images:** Fill number 5 and choose 5 image of one animals

- **Voice:** Search sound of that animal

+ That's it! Easy right?

Look at Source script of Gameplay object, you need to place it fully with UI object in Menu

- **Score and Best** in UI
- **Score\_Game Over and Best\_Game Over** in GameOver object
- **Timer:** timer bar object script
- **GameOver:** gameover object
- **Animal Target Name, Animal Target Image and List of Animal UI Image** are in Menu object
- **List Animals:** place all animals in Gameplay in this List. Current 30 animals, if you want more, increase it by create new Animal like I said above and place it in this List Animals

### 3. AdsController

Just copy your admob ID and paste on it, everything is ready.
